Because we care about our home: sort your waste correctly!

Together for a clean Garmisch-Partenkirchen!

Gemeindewerke Garmisch-Partenkirchen

Information about residual waste collection

Out of sight, out of mind: this is often how we think about things we throw away in our daily lives. That is fine, as long as you take a moment beforehand to consider whether something really belongs in the black residual waste bin or whether it would be better placed in one of the recycling containers.
Most materials can be recycled very effectively. The more carefully you sort your waste, the more you contribute to the recovery and reuse of valuable materials.

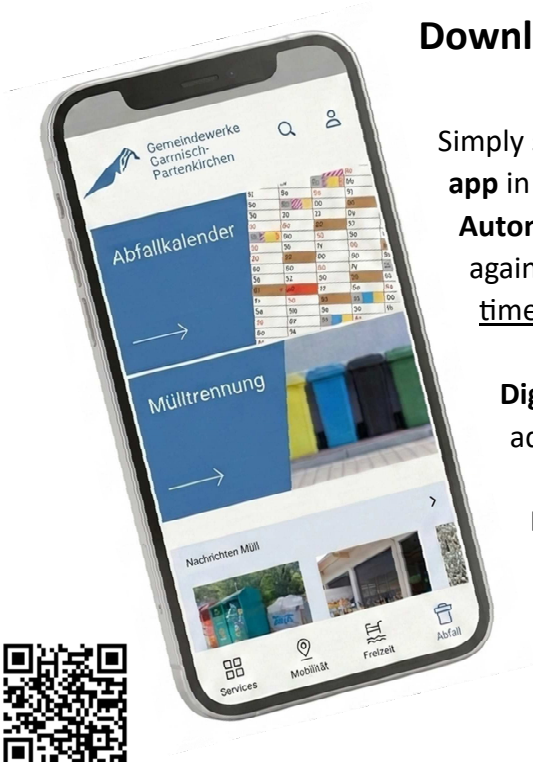
If you use resources sparingly, avoid unnecessary packaging and sort your waste correctly, you will be surprised at how little is left for the residual waste bin!

✓ What goes in the residual waste bin:

Vacuum cleaner bags, street sweepings, ash (only when completely cold), cigarette butts, eggshells, pens, cat litter and small-animal bedding, painter's protective sheeting, wallpaper, nappies, small quantities of carpet and flooring scraps, dirty or coated paper, waxed paper and carbon paper, hygiene paper products, dirty pizza boxes.

✗ What must NOT go in the bin:

Electrical appliances and batteries/rechargeable batteries (take them to a recycling centre or retailer). Organic waste and food scraps (put these in the organic waste bin). Recyclable materials such as clean paper, glass or items intended for yellow/green recycling bags (packaging). Hazardous substances such as liquid paint, varnish or chemicals (take these to the hazardous waste collection).



Download the app and use the digital waste collection calendar!

Simply search for the official **Gemeindewerke Garmisch-Partenkirchen app** in the App Store or Google Play Store.

Automatic reminders: Never miss a residual waste collection day again. Please enable push notifications in the app settings to receive timely reminders.

Digital waste collection calendar: View all collection dates for your address at a glance.

Practical waste-sorting guide: Quick help whenever you are unsure which bin an item belongs in.

Please note: Only residual waste bins filled correctly will be emptied.

Waste disposal fees - Fee rates for private households with waste collection every 14 days.

Residual waste containers	Annual	Monthly
80-litre capacity (including 120-litre organic waste bin)	€200.00	€16.67
120-litre capacity (including 120-litre organic waste bin)	€300.00	€25.00
660-litre capacity (including 120-litre organic waste bin)	€1,650.00	€137.50
1,100-litre capacity (including 120-litre organic waste bin)	€2,750.00	€229.17
Each additional 120-litre organic waste bin	€73.00	

If the type or number of waste containers on a property is changed more than once within 12 months, at the owner's request or for another reason (particularly a change in use), a fee of €73.00 is charged for each change after the first.

For waste containers whose storage location is more than 30 metres from the public road (road boundary), the following annual transport surcharge applies per waste container (80 or 120 litres):

Zone I: Distance of 30 to 60 metres €89.00 per Year
Zone II: Distance of more than 60 metres €178.00 per Year

The transport surcharge does not apply if waste collection vehicles can reach the storage location without any difficulty or risk to traffic safety.

Fees for special collections (one-off)

1 x residual waste up to 120 litres	€63.00, additional residual waste bin (collected at the same time): €9.00
1 x organic waste up to 120 litres	€59.00, additional waste bin collected at the same time €2,00
Paper recycling bin	€58.00, (including multiple containers collected at the same time)
1 x residual waste container, 1,100 litres	€138.00
1 x residual waste container, 660 litres	€117.00

Additional 70-litre waste sack (available for purchase at the Customer Service Centre): €6.70

Provision of compactor containers – Rental fee per cubic metre of capacity: €306.00 per year or €25.50 per month

Compactor container fee – based on capacity per cubic metre: €71.50

If waste that has been improperly treated, stored or deposited is presented for disposal, a landfill fee of €0.45 per kilogram and an hourly rate of €75.00 will be charged. For hazardous waste, transport fees and the hourly rate will be charged in addition to the actual disposal costs incurred.

Green waste delivered by private households – up to 100 kg (excluding grass clippings): free of charge

More than 100 kg: €0.095 per kilogram. This does not apply if the waste was previously collected or picked up commercially. Regular commercial suppliers can enter into a framework agreement with the Gemeindewerke for the delivery of green waste.
